

THE COMPANY

Bio Health Solutions, maker of AminAvast®, is committed to the development of high quality products to improve and extend the lives of companion animals.

COMMITMENT TO QUALITY

With a full commitment to science, our work springs from the combination of our original peer-reviewed research, patented formulation, ongoing clinical studies and documented safety. Unlike other supplement companies, our commitment to science is paramount.

SAFE AND EFFECTIVE

All manufacturing is done in the USA to ensure the safety of our products with globally sourced ingredients. AminAvast has been shown to be safe and effective in multiple research studies. Millions of doses have been administered by veterinarians not only in the US but in 36 countries around the world.

AMINAVAST®

SUPPORT FOR
CATS & DOGS

MADE IN THE USA

ABOUT AMINAVAST®

- What are the active ingredients and how do they support my pets kidneys?

1. Glycine: Helps support renal health and function.

2. L-Aspartic acid: Helps support normal blood-serum creatinine and blood-urea nitrogen (biomarkers of kidney function).

3. L-Glutamic acid: Acts as an efficient reactive-oxygen species scavenger and thereby helps support kidney health at the cellular level.

4. L-Glutamine: Acts as a regulator of protein, glycogen, and free fatty acid metabolism and regulates gluconeogenesis. Suppresses proteolysis in muscles, and stimulates protein synthesis, thereby helping maintain normal muscle mass.

5. L-Carnosine: Increases BMP-7; supporting normal renal architecture, kidney cells and function.

6. L-Histidine: Is an essential amino acid for normal humans and for other mammals needing kidney support.

7. L-Arginine: Helps support normal glomerular filtration rate (GFR), and normal serum creatinine levels.

HOW IS AMINAVAST® SUPPLIED?

- AminAvast is supplied as a bottle of 60 capsules or a pouch of soft chews in 2 formulations
- 300mg capsules for cats and small dogs
- 1000mg capsules for larger dogs

AminAvast for Cats and Small Dogs 300 mg

Each capsule contains:

Active Ingredients: AB070597* (Glycine, L-Aspartic acid, L-Glutamic Acid, L-Glutamine, L-Carnosine, L-Histidine, L-Arginine).

- Under 10 lbs 1 capsule twice daily
- 11-20 lbs 2 capsules twice daily

HOW DO I ADMINISTER?

- Most cats and dogs will eat AminAvast® in their regular food.
- With an easy-to-use sprinkle capsule, simply sprinkle over their food or hide in a special treat.
